

To Our Friends & Family:

As the nation begins to heal and begin the “recovery” phase of the COVID-19 Pandemic, many venues such as businesses, restaurants, physician offices, etc. have opened on a limited basis for visitors/guests.

Our residents and staff appreciate the time you spend with your family member and friends in our center; however, due to the high risk population we care for and continued COVID19 activity within the state of _____ the CDC and CMS have recommended that visitors continue to be limited to essential visitors only—which at this time are limited to service providers.

In an effort to prevent the spread of COVID19 to our community we are adhering to these recommendations and are not allowing visitors in our center until further notice. We continue to believe that this is still the right approach, and a key step in limiting potential exposure to the virus.

We will make every effort to provide a means of communication with your loved one and will share that information with you as it becomes available (e.g., telephone, ,Skype, Facetime, etc.). This will allow you to communicate directly with your loved one without increasing the risk of infection spread.

If you should have any questions please contact _____ at _____.

Thank you for your understanding. We will continue to keep you updated on any changes in recommendations. Stay well!
